

Notice on Inaugural Meeting of the IADS Intrinsic Safety Technical Committee

To All Relevant Organizations and Automotive Safety Practitioners:

The rapid advancement of intelligent new energy vehicles (INEVs) has introduced new challenges, with safety and quality concerns emerging as critical bottlenecks impeding large-scale adoption and sustainable industry development. Both domestic and international stakeholders are actively engaged in research and initiatives addressing driving safety, intrinsic safety, control safety, interaction safety, and wellness safety. Ensuring the safety of INEVs is a complex, system-level undertaking that necessitates strengthened international collaboration, knowledge sharing, and technological innovation to collectively tackle emerging challenges.

According to the work plan of the Intelligent New Energy Vehicle All Domains Safety Association (IADS), the **Inaugural Meeting of the IADS Intrinsic Safety Technical Committee** is scheduled to be held in **Shenzhen on September 17, 2025**. The event will also feature discussions on the following topics:

- **Internationalization of New Energy Vehicle Standards**
- **Export practice experience in the fields of whole vehicles, power batteries, and energy storage batteries**
- **CAERI's work in the areas of batteries, V2G, and electrical safety for NEVs.**

We sincerely invite all relevant organizations and automotive safety practitioners to participate. The details of the meeting are as follows:

1. Agenda

Time	Agenda
13:30–13:35	Opening Remarks
13:35–13:40	Welcome Address by Secretariat Leader
